Read Me_CERES4.50.09_Purchase and Donation Order Pallet Printing (Ceres4.50.09)
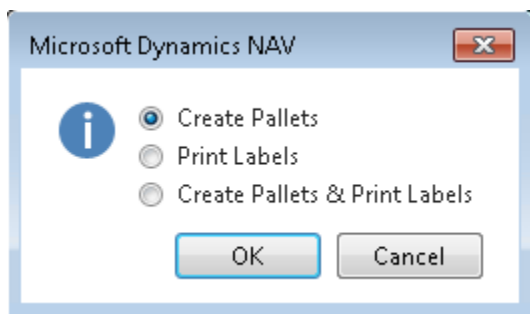

Service Request or Support:

Issue addressed: When using Create & Print Pallet Labels from a Donation or Purchase Order, Labels for all pallets on the document are printed; even those pallets for which Labels have already been printed.

Type	ID	Name
Table	14012324	Pallet
Codeunit	14012258	Lot Management

This release does not present a change in system usage methodology.

Resolution: Ceres was enhanced to address the reported issue by printing Labels for only those pallets that have not yet been printed. Consider the scenario whereby a new document line is created with Tiers and Height that will result in three pallets when the Create Pallets & Print Labels option is selected. In this case, Ceres will create and print labels for the three new pallets. A second document line is created with Tiers and Height that will result in two additional pallets when the Create Pallets & Print Labels option is selected. Prior to this release, Ceres would have printed five pallet labels (e.g. three for the preexisting and two for the additional pallets). With this release, Ceres will only print labels for the two additional pallets.

Note: the Print Labels option will continue to function as it did before this release; it will print labels for all pallets on the document. Note also that if it is desired to reprint individual (or select) pallets, you can do so by drilling up on the pallet number (from the document line), selecting Advanced from the simple list, and then selecting the Print action on the Pallets page.
