

Read Me CERES4.50.66 Cannot Reopen Agency Order when Location Code is not Specified (Ceres4.50.66)

Service Request or Support:

Issue addressed: If an Agency Order is released without a Location Code having been provided on the order header and "Automatic Delivery Charge Calc." is enabled on Agency & Receivables Setup, the Agency Order cannot be reopened. The error message shown below is displayed.

Type	ID	Name
Codeunit	414	Release Sales Document

This release does not present a change in system usage methodology.

Resolution: Ceres was enhanced to address the reported issue by conditioning the retrieval of the Location record. Since the "Automatic Delivery Charge Calc." functionality does not create delivery charges (during release) when Location Code is blank (and Location Code cannot be changed while in the released status), it is not necessary to retrieve the Location record when reopening the order.
