

## Read Me 4.51.39 Grocery Rescue Web Import Missing Filter to Initialize Donation Order Header (Ceres4.51.39)

Issue addressed: The Grocery Rescue Web Import is missing a filter which causes Ceres to not 'Init' the Donation Order Header record which then causes the Receiving No. and Posting No. to be blank along with the other fields that the 'Init' process handles.

### Objects Affected:

Type	ID	Name
Report	14012498	Grocery Rescue Web Import

This release does not present a change in system usage methodology.

Resolution: With this release, Ceres has been enhanced to address the reported issue by updating the Grocery Rescue Web Import process (Report 14012498), to add a filter on the 'Buy-from Vendor No.' field, before the Donation Header record is created, to achieve an initialization of the Receiving No. and Posting No. along with other fields that the 'OnInsert' trigger handles.
