

Read Me 4.51.42 Allow Allocation Code only for Account Type of GL Account
(Ceres4.51.42)

Issue addressed: Allocation Codes should not be allowed on lines when the account type is NOT G/L Account. Using allocation codes on lines with other account types such as agency, vendor or bank resulted in errors when posting.

Objects Affected:

Type	ID	Name
Table	81	Gen. Journal Line
Codeunit	13	Gen. Jnl.-Post Batch
Codeunit	80	Sales-Post
Codeunit	90	Purch.-Post

This release does not present a change in system usage methodology.

Resolution: With this release, Ceres has been enhanced to address the reported issue by limiting the use of an Allocation Code to transactions having the "Account Type" of G/L Account only.
