

## Read Me 4.51.44 Code Updates for AE Questionnaire Communications

### (Ceres4.51.44)

Issue addressed: When using AE Questionnaires, certain variables in Outbox Processing are configured to “run on client” when they should run on the server. Additionally the AE Survey's – Inbound XML Port has an incorrect NameSpace.

Objects Affected:

Type	ID	Name
XMLPort	14012290	AE Survey's - Inbound
CodeUnit	14012262	Outbox Processing

This release does not present a change in system usage methodology.

Resolution: With this release, Ceres has been enhanced to address the reported issue by updating the variables in Outbox Processing to run on the server and correcting the NameSpace in the AE Survey's – Inbound XML port.
