

## Read Me 4.51.45 Unfiltered Deletion of Full Pallet Suggestions on Movement WorkSheet (Ceres4.51.45)

Issue addressed: The "Clear WAP Lines" process on the Movement Worksheet (page 7351) deletes Full Pallet suggestions for all Locations, not just the Pallet Suggestions associated with the WAP Lines being cleared. When Pallet Suggestions are being deleted, it appears that a process, to ensure that all Full Pallet Suggestions are deleted, is doing an unfiltered delete.

### Objects Affected:

Type	ID	Name
Table	7326	Whse. Worksheet Line
Table	14012454	Pallet Suggestion

This release does not present a change in system usage methodology.

Resolution: With this release, Ceres has been enhanced to address the reported issue by updating the Whse. Worksheet Line (table 7326) to include a Location Code filter when the Pallet Suggestions are deleted.
