

Deliver Superior Results with Microsoft Dynamics ERP

BENEFITS

- **Familiar to your people.** With the intuitive Microsoft user experience and integration with familiar Microsoft programs, you can get people up and running quickly, free up IT resources, and give people quick access to the information they need to make better business decisions.
- **Fits with your existing IT systems.** Reduce maintenance and administration costs and standardize your IT footprint by taking advantage of integration with Microsoft® Windows®, Windows Server®, Microsoft SQL Server®, Microsoft Office, and Microsoft Office SharePoint® Server.
- **Meets the needs of your organization—today and in the future.** Microsoft Dynamics ERP solutions are available to fit your industry, company size, and budget. The solutions are designed to help minimize complexity as your organization grows and adopts new technology.
- **Backed by the Microsoft name.** With the power of Microsoft research and development and the support of thousands of developers, partners, and support staff, you can feel confident investing in Microsoft technology.

Drive business performance, measure financial effectiveness, and make better business decisions that deliver immediate results.

Successful organizations today need the right enterprise resource planning (ERP) software to help their people drive key business processes, make smarter and faster decisions, and ensure they make the most of their assets and resources. Microsoft Dynamics® ERP provides these capabilities to organizations as small as a few employees starting a new venture to organizations spread across the world—for companies with just one server to operations tied in with the home office enterprise ERP standard.

With Microsoft Dynamics ERP, you can accomplish mission-critical tasks across your organization. Reduce the cost of doing business and improve customer service by connecting and streamlining your entire supply chain; help simplify compliance and planning by making comprehensive, current financial reporting available to all employees; and look deeper into key performance factors to pinpoint efficiencies, identify potential issues, and take swift action.

Choose the right solution for you

Microsoft Dynamics ERP solutions are designed to meet the needs of your organization's unique business requirements and include specialized functionality tailored to your vertical industry processes. Evaluate the four solutions—Microsoft Dynamics AX, Microsoft Dynamics GP, Microsoft Dynamics NAV, and Microsoft Dynamics SL—to choose the right solution for you.

Microsoft Dynamics AX

Microsoft Dynamics AX 2009 is a comprehensive business management solution for midsize and larger organizations that works like and with familiar Microsoft software. Microsoft Dynamics AX is built to make it easy to do business across locations and countries by consolidating and standardizing processes, helping to improve productivity, providing visibility across your organization, and helping to simplify compliance.

Microsoft Dynamics GP

Microsoft Dynamics GP is a comprehensive business management solution for midsize organizations that is designed to help you adapt to new opportunities and continued growth by requiring little customization, training, and administration. Whether your goals are to improve financial management or supply chain performance, or gain greater control over your human resources and payroll processes, Microsoft Dynamics GP is a proven, cost-effective solution.

Microsoft Dynamics NAV

Microsoft Dynamics NAV is a complete ERP solution for midsize organizations that is fast to implement, easy to configure, and simple to use. Available in more than 42 country versions, the solution delivers specific industry functionality for highly specialized industries and organizations to help you meet the local needs of your regions of operation.

Microsoft Dynamics SL

Microsoft Dynamics SL is a business management solution that is specialized to help project-driven midsize organizations obtain reports and business analysis, while helping to increase efficiency, accuracy, and customer satisfaction. With the ability to automate and streamline projects and complex accounting jobs from a single interface, you can manage people, projects, and profitability.

In addition, Microsoft Dynamics ERP retail solutions include Microsoft Dynamics POS 2009, a retail store management system, and Microsoft Dynamics Retail Management System (RMS), a complete point of sale solution for small and midsize retailers that can be adapted to meet unique retail requirements.
